

IMPACT LIGHTS

BY ARMORLITE TECHNOLOGIES INC

Water Resistant

Temperature Stable

Impact Safe

High output LED emitters for efficient operation

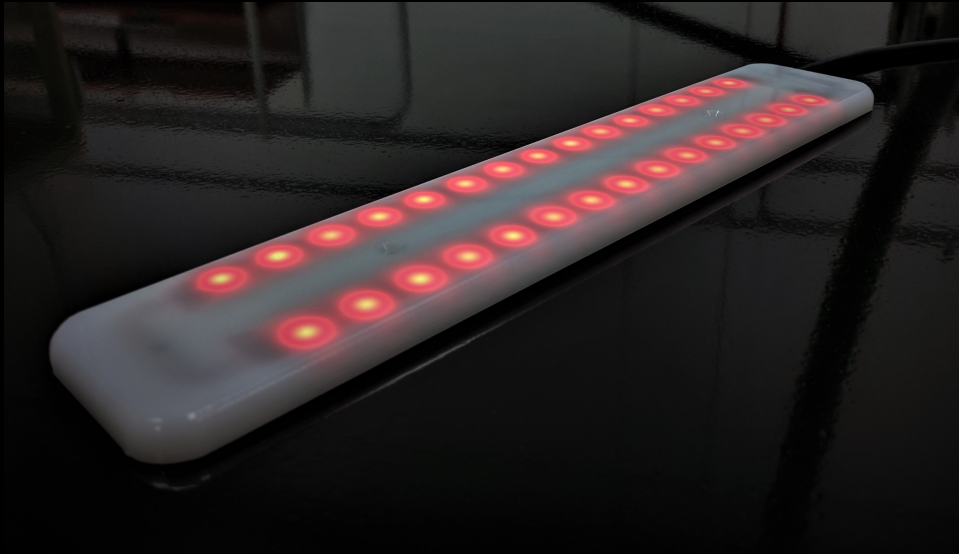

Custom aluminum heat sink ensuring constant lumen output during extended use

High density, impact rated lens body for amazing durability

All impact lights are manufactured in our Canadian facility to ensure the highest quality product possible.

Impact safe-lights have been independently fog tested and show less than 0.05 density alteration which exceeds Enbridge and TransCanada pipeline specifications.

Impact LED Lights are currently offered in high output white, safelight red or paired together in the same lens body to completely replace your existing darkroom lighting.

Lights can be purchased with bare wire ends for installation in existing 12VDC circuits or purchased with integrated power supply, switch and hardware for installations into 110VAC systems.

Technical Specifications:

Voltage	12VDC or 110VAC
Size	.33" x 2.40" and up to 96" long
Output	400 lumens/foot @ 5600K (white)
Current	5W/foot @ 5600K (white)
Bulb Life	30,000 hrs.
Temp	-40°C to +60°C
Rating	IP66 Water Resistant
